UPIN# _____	Diagnosis: _____ ICD10: _____

### Specimen Type:

Blood: 21 cc, yellow-top ACD tubes

Collection Date \_\_\_\_\_ Collection Time \_\_\_\_\_

### Collection and Transport Instructions:

1. Specimen must be received within 24 hours of collection. Specimens received after 24 hours will be rejected.
2. Blood draws should be scheduled on Monday-Thursday, or, in the case of holidays, at least two days prior to the holidays, to allow overnight shipping and receiving the next business day without interruption by holidays or weekends.
3. Blood samples will be collected in three 8.5 mL BD Vacutainer ACD Solution A tubes (BD ACD-A) (yellow top). Product #s for the BD ACD-A tubes in the US is 364606.
4. Ensure that at least 8.5 mL of blood is drawn into each tube. Avoid low volume to minimize agitation during shipping.
5. After blood draw, invert the tubes gently 180 degrees and back 3-4 times.
6. Store samples at 4-8°C in a refrigerator if a cold box (see below) is not immediately available (maximum exposure to ambient temperature should be limited to 2 hours). DO NOT put the tube on ice. Do NOT leave the samples overnight in a refrigerator. Ship the same day before close of business (see below).
7. Activate the FEDEX cold box by pressing the actuator button and place the BD-ACDA tubes wrapped in bubble wraps snugly in the shipping box, along with the sample requisition sheet.
8. Ship by FEDEX to the recipient address above the same day of blood draw. Select overnight delivery, to be delivered before 10am. Notify the recipient of the tracking number on the day of shipment by an email with a subject title identifying the study.

Fedex cold boxes are available at [http://images.fedex.com/us/healthcare/pdf/Cold\\_Shipping\\_Info\\_Sheet.pdf](http://images.fedex.com/us/healthcare/pdf/Cold_Shipping_Info_Sheet.pdf) or <http://orderboxesnow.com/>.
